Welcome to ImageForge!

ImageForge is your personal AI-powered design assistant, ready to generate **stunning visuals** with minimal effort. Whether you need concept art, digital illustrations, or something entirely unique, this guide will help you get the **best results** from your prompts.

How to Use ImageForge

1. Start Your Creation Process

You can begin by selecting one of the three conversation starters:

- **Instruction Guide** – View this guide anytime for help.

- **Help me visualize an idea** – Describe a concept, and ImageForge will bring it to life.

- **I need a creative concept!** – Let ImageForge suggest and generate something unique for you.

Alternatively, just type a description of what you want to create!

2. Writing the Perfect Prompt

The more details you provide, the better the results! Here's a simple structure to follow:

"A [medium] of [subject], [subject's characteristics], [relation to background] [background]. [Details of background] [Interactions with color and lighting]. Created using: [At least 8 specific style traits], HD quality, natural look, aspect ratio [w]:[h]."

Example:

"A cinematic digital painting of a futuristic city, glowing neon lights reffecting on wet streets, a lone figure in a trench coat standing beneath a holographic billboard. Dark clouds in the sky, distant ffying cars in the background. The lighting is dramatic, with high contrast and cyberpunk aesthetics."

3. Refining Your Image

If the first image isn't quite what you envisioned, ImageForge provides three **suggested modifications** after each creation. You can:

■ Select one of the suggested refinements.
■ Ask for a custom adjustment, like changing colours, adding details, or altering the perspective.
■ Generate a completely new version by modifying your prompt.

Advanced Features s Pro Tips

Experiment with Art Styles

ImageForge can create **any artistic style** you imagine! Try

specifying:

- **Painting styles** – Oil painting, watercolour, abstract, surrealism.

- **Photography techniques** – HDR, macro, black C white, cinematic lighting.

- **Illustration types** – Comic book, anime, pixel art, concept sketch.

- **3D and Digital Renders** – Sci-fi landscapes, fantasy creatures, futuristic cities.

„9·˙ Example: *"A detailed oil painting of a stormy ocean, waves crashing against jagged rocks, with a lighthouse glowing in the distance."*

·¸'˙ **Adding Text to Your Image**

Need words in your image? Use quotes to specify the text, and ImageForge will place it naturally in the scene.

■ **Text Example:** *"Welcome to the Future" in bold, neon style*
■ **Specify Placement:** *centred, bottom-right, on a street sign, etc.*
■ **Font s Styling:** *Modern sans-serif, elegant cursive, glowing effect, etc.*

FAQs – Frequently Asked Questions

Q: My image isn't what I expected. What should I do?

Try adjusting your prompt by adding **more details** about colours, lighting, perspective, or background. You can also use one of the **suggested refinements** provided after each generation.

Q: Can ImageForge generate hyper-realistic images?

Yes! If you want **photorealistic** results, include terms like:
- **"Ultra-realistic photography"**
- **"Shot on a 50mm lens, cinematic lighting"**
- **"HDR details, crisp textures"**

Q: How can I create fantasy or sci-fi images?

To make your image look like it's from another world, use words like:
- **"Futuristic"** – neon-lit cities, AI robots, space travel.
- **"Medieval fantasy"** – castles, knights, magical forests.
- **"Surreal"** – dreamlike landscapes, floating islands.

Final Thoughts s Next Steps

s̗7 ˙∴ **Now that you know how to use ImageForge, let's start creating!**

Simply type a description, and I'll generate a **stunning visual** for you. If you ever need help, just select **"Instruction Guide"** or ask for refinements.

Happy creating! Q ˙∴˙ +x
